

Rail grab with safety lock model TCR

Capacity 1000 - 2000 kg

The TCR rail grab transports rails, as used by railways, easily and safely. A safe grip is ensured by the lever operated safety lock. For long rails, two grabs must be attached to a spreader beam to avoid sagging.

Since the rails are primarily grabbed with positive fit, it is important that the clamp stays in a vertical position during initial lift.

A TCR multiple rail system is also available for the simultaneous transport of up to 12 rails.

**For special sizes please advise
rail type and profile.**
